Projects

Pipplio

React Mongo GraphQL Express

A straightforward networking app for people who want to get into the startup scene, but don't have anyone to join them - yet.

BBTransit

PHP JS HTML AWS MySQL

A transport alert app that aims to simplify the daily life of commuters by offering access to simple yet meaningful info such as bus arrival times, destinations and locations.

QueueTube

Chrome API HTML CSS JS

A Google Chrome extension which serves to improve users' experiences on YouTube by providing a means to queue up videos they want to watch at the same time.
